QUICKDRY

Why should i use urecel quickdry foam

QuikDry Foam®

Mold forming on normal foam

In-built Uregard anti-microbial technology prevents moulds. Urecel QuickDry is the advanced, high-performance foam designed specifically for outdoor cushions.

Urecel QuickDry is produced by a sophisticated process called Hydro-Blast Reticulation.

Water and air/humidity (through seam)

Water and air/humidity (through zipper)

Our seams and zips are designed to release air and humidity.

No introduction is needed when speaking of Sunbrella fabrics because its brand and quality are very well known by the vast majority of consumers. That is why ATC Furniture is proud to be one of Sunbrella's verified suppliers here in South East Asia. Just like buying directly from Sunbrella, we offer the same 5-year warranty period for Sunbrella fabric so you do not have to worry about the quality and durability of the product. In addition, we also provide a wide range collection of colors with best pricing and fast delivery time as well.

ROPE WICKER

Rope has been popularly used in many different design purposes from fashion clothing to house decoration thanks to its simple yet stunning looks. In addition, its durability as well as flexibility enable many designs to become reality in various shapes and sizes. All of which make rope become one of the top material options for weaving wicker furniture, especially outdoor wicker furniture, as it brings out an exclusive beauty that you cannot find in others.

POLY RATTAN

Poly rattan has been popular for over decades due to its durability and beauty. It has a variety of shapes, sizes and textures as well as colors, offering endless options to choose from.

Taking advantage of its multiform feature, ATC Furniture has been constantly researching and developing new different designs from poly rattan, aiming to come up with more and more remarkable furniture models to be a part as well as the lead of the latest trends in the market.

SIGMA WICKER

First launched in VIFA Fair 2018, this specially invented wicker has been our big hit since.

Sigma wicker has a round shape which is empty inside. It is thicker and bigger than other normal poly rattan, featuring two different and contrasting colors slowly descending into one another harmoniously. Therefore, the models woven of Sigma normally look solid, impressive and easy to attract people's attention at the first sight, meeting special demands for niche markets.

TEAK WOOD

Just like the human fingerprints, every teak tree out there is one of its kind. Even within the parameters of any managed plantation environment, no two trees share the same ground or reach for the light in the same way. For that reason, each tree grows and matures in its own unique way with the natural variations and irregularities that give the timber its inherent appeal. With every growth ring, every knot, every graceful ebb and flow of the grain stands a testament to its journey from a young sapling to mature tree – a journey of up to 70 years. But they all have one thing in common, which is to produce one of the finest woods on the planet that you could possibly find.

WATER HYACINTH

This is the very first raw natural material that was used to make the name of the ATC Furniture Corporation to this date. It is our expertise in producing anything relating to water hyacinth from in-house indispensable furniture to home accessories with countless designs, unique colors and hundreds of different applications. Moreover, this sustainable and renewable wicker can bring an outstanding scenery and comforting to your space. To keep the quality in check, ATC Factory operates both as a farming and processing plant so that every finished hyacinth or cane furniture will be precise, even with the smallest detail to our own standards. Therefore, our products are incomparable to other competitors in the market.
